Blue Cross Medicare Advantage Dual Care Plus Preferred (PPO SNP) 2022 Program Summary

The Blue Cross Medicare Advantage Dual Care Plus Preferred (PPO SNP) program started Jan. 1, 2022. The Special Needs Plan (SNP) will continue in its current form for three years. The program serves older adults and people with disabilities.

Benefits to being in the SNP program include:

- Having the member's care coordinated between Medicare and Medicaid covered benefits.
- Having a care manager assigned to coordinate benefits and services.
- Assigning care teams to make individual care plans to support member needs.

Requirements of the Plan include:

1. An Initial Health Risk Assessment (HRA) within 90 days of SNP enrollment. The HRA includes assessment of medical, social, functional, and behavioral health needs.
2. Another HRA is completed within a year of the Initial (or most recent) HRA. This helps us keep up to date with the member's progress.
3. An Interdisciplinary Care Team (ICT) is created for the member. This team is made up of the Primary Care Provider (PCP), other medical staff and those who offer services for the member's care. An ICT meeting takes place within a year of the member's SNP enrollment
4. An Interdisciplinary Care Team meeting occurs once a year or when there is a change in condition.
5. Primary Care Providers who service SNP members are trained once a year about the program requirements and benefits.

Results of the SNP program last year:

At the end of 2022, the SNP program had 774 members.

We hold ourselves to high standards. Every year we measure how well we are doing with meeting the program requirements. We also measure our progress in helping members stay healthy and making sure your experience is a good one. Here are our 2022 results:

	Our Goal	2022 Results
PROGRAM REQUIREMENTS		
How many members had their Initial Health Risk Assessment (HRA) completed within 90 days of enrollment (result includes members who refused or were unable to be reached)	100%	57.66%
How many members got a repeat HRA within a year of the first one	100%	58.33%
How many members had their Interdisciplinary Care Team (ICT) meeting completed within 365 days of enrollment	100%	100%
How many members had an ICT meeting completed yearly after the initial ICT meeting	100%	100%
How many primary care providers completed their yearly training about this program's details	90%	34.53%
MEDICAL OUTCOMES		
Hospitalizations per 1000 members per year	229.0 or less	227.9 Acute Hospital
Observed/expected ratio of members readmitted to the hospital within 30 days (goal is number listed or lower)	Under age 65: 1.70 Age 65 & over: 0.71	Under age 65: 0.4933 Age 65 & over: 1.7279
Percentage of members with medication reconciliation after hospital discharge	63%	52.17%
Percentage of members who continue taking their oral diabetes medications	80%	83%
Percentage of members who continue taking their blood pressure medications (ACE/ARBs)	84%	82%
Percentage of members who continue taking their statin medications	82%	82%
Percentage of members who continue taking their anti-depressant medication	57%	73.53%
Percentage of members with BP controlled	60%	58.78%
Percentage of members with annual flu vaccine*	70%	57%
Percentage of members 66 and older who had the following services by their providers:		
Functional assessments	71%	83.11%
Pain assessment	81%	92.24%
Medication review	77%	100%
PATIENT EXPERIENCE*		Top 3 Box Score
Member satisfaction with their providers	75%	93%
Member satisfaction with their care coordination	75%	81%
Member satisfaction with their health care quality	75%	87%
Member satisfaction with overall Plan	75%	96%

Members were very satisfied with the quality of their care, their providers, their care coordinators and the SNP plan itself. Members completed their Interdisciplinary Care Team Meetings successfully. We continue to work with members to improve measured health outcomes and help with management of conditions, taking medications, and preventing unnecessary admissions to the hospital. Many of these measures are tracked in the provider's record of care and action plans may be developed to address these items.

*From a mail survey conducted October-November 2022. Overall response rate was 13%. Respondents were asked to rate on a scale of 1 to 5; 1=Strongly Disagree and 5=Strongly Agree and to self-report if the flu vaccine was obtained.

PPO Special Needs Plan provided by Health Care Service Corporation, a Mutual Legal Reserve Company (HCSC), an Independent Licensee of the Blue Cross and Blue Shield Association. HCSC is a Medicare Advantage organization with a Medicare contract and a contract with the New Mexico Medicaid program. Enrollment in HCSC's plan depends on contract renewal.
